

Invisible Dangers?
Fresh air starts with Us

Breathe Better. Live Healthier

At Airsence, we redefine indoor air quality by delivering complete home air purification systems that protect what matters most - your health and your family.

Our Promise:

Guaranteed AQI below 50, no matter how polluted the air outside is.

Designed for:

Homes & Apartments

Villas & Gated Communities

Premium Residential Spaces

Pure air isn't a luxury. It's a necessity.

The Problems & Our Solution

The Invisible Threat Inside Your Home

Outdoor air pollution doesn't stop at your door. Harmful particles enter your home through:

- Open Windows & Doors
- Ventilation Systems
- Daily Movement Of People

Common indoor pollutants include:

- PM2.5 & PM10
- Allergens & Dust
- Smoke & Harmful Gases
- Bacteria & Airborne Contaminants

The Air Sense Solution

Airsense provides a centralized, whole-house air purification system that works silently in the background to:

- Continuously Filter Incoming Air
- Purify Air Across Every Room
- Remove Harmful Air Pollutants For Clean, Safe Air Every Day

Clean, Healthy air in every corner of your house.

Our Care Solution

1. IAQ Solutions

We provide real-time indoor air quality analysis that allows comparison of multiple pollutants. Our IAQ assessments are aligned with recognized standards such as NAAQS and WHO, customized according to site conditions and client requirements.

2. Molecular Filtration

Our molecular filtration solutions are based on advanced adsorption technology that effectively reduces VOCs, foul odors, and acidic gases. These systems support healthier indoor environments and help safeguard sensitive processes.

3. AirSence Care+

AirSence Care+ goes beyond routine HVAC maintenance. This comprehensive service includes in-depth evaluation of the entire HVAC system to ensure optimal performance, energy efficiency, and sustained indoor air quality.

No matter how bad the outdoor AQI gets, your indoor air stays safe.

CLEAN AIR FOR THE MOMENTS THAT MATTER.

The Invisible Pollutants in Your Indoor Air

1. Carbon Dioxide (CO₂)

High CO₂ levels can cause headaches, fatigue, poor concentration, and reduced productivity.

2. Nitrogen Dioxide (NO₂)

A harmful gas that affects lung function and can worsen asthma, especially in children.

3. Ground-Level Ozone (O₃)

Irritates the respiratory system, leading to chest discomfort, coughing, and aggravated lung conditions.

4. Formaldehyde

A common indoor pollutant that causes irritation to the eyes, nose, throat, and respiratory tract over time.

Technology & Guarantee

Advanced Multi-Stage Purification

Our systems use a powerful combination of:

- High-Efficiency Particulate Filtration
- Advanced Pollutant & Odor Control
- Intelligent Air Circulation Technology

This ensures:

- Removal Of Ultra-Fine Particles
- Reduction Of Allergens & Irritants
- Fresher, Lighter Indoor Air

Our AQI Guarantee

We don't just promise - we guarantee.

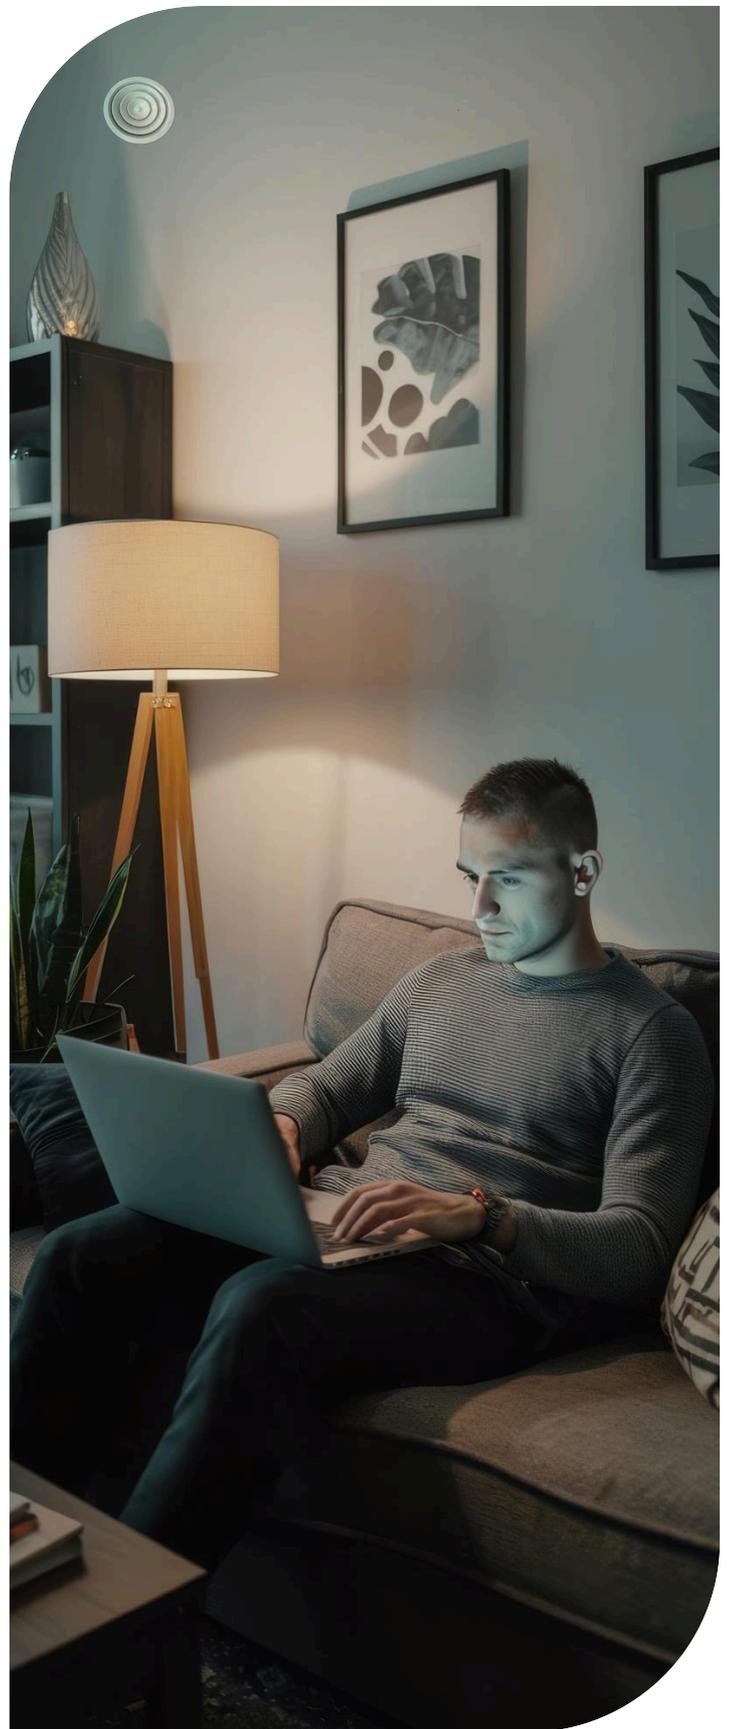

Indoor AQI Below 50 With
Airsense

Effective Even During Extreme
Outdoor Pollution

Intelligent Air Purification For
Healthier Living

Breathe pristine indoor air with better oxygen levels

Focus on Health and Performance

Medical Grade Precision

By Utilizing Industrial-Strength HEPA Filtration, We Capture 99.97% Of Airborne Particles, Including PM2.5, Allergens, Mold Spores, And Even Ultra-Fine Viruses

Clinical Consistency

We Don't Just 'improve' Air Quality; We Guarantee It. Our Systems Are Engineered To Bring Fresh Oxygen In The House That Ensures You To Have A Healthier Living And Removes The Symptoms Of Mental Sickness Like Depression And Fatigue."

Whole-Home Ventilation

Our Solution Goes Beyond Filtration By Ensuring Constant Air Exchange, Preventing The Buildup Of CO2 And Volatile Organic Compounds (VOCs) That Portable Units Often Miss."

Key Elements of Your Mission

- The What: Maintaining a consistent AQI below 50.
- The How: Centralized, whole-home HEPA filtration.
- The Why: Peace of mind, health, and a clutter-free environment.

Clean air is the foundation of a healthy life.
